The EASA-Q manual has been completely revised to conform to the year 2000 revisions to the ISO 9000 series of international standards for quality. The new *EASA-Q:2000 Quality Manual* is a guideline for implementing the current ISO 9000 series of quality system standards.

The prior EASA-Q and ISO manuals (1994 versions) had twenty elements, where the new versions consist of eight sections. The new standards include most of the requirements of the prior versions, as well as some important new requirements. Principal among the new requirements are customer satisfaction and continuous improvement.

Because the year 2000 version of ISO met the unique requirements of the earlier EASA-Q, the revised EASA-Q manual is patterned strictly after ISO 9001-2000.

EASA-Q:2000 now provides a complete template for a quality manual, in MS Word format, detailed guidelines to assist in implementing the eight sections of the new standard, sample documents for procedures, and a cross reference guide to compare ISO 9000:1994 to ISO 9000:2000 requirements.
